

Section 4: Overview of Cellular Respiration

# Study Guide B

## KEY CONCEPT

The overall process of cellular respiration converts sugar into ATP using oxygen.

## VOCABULARY

cellular respiration	anaerobic
aerobic	Krebs cycle
glycolysis	

**MAIN IDEA:** Cellular respiration makes ATP by breaking down sugars.

1. What is cellular respiration?

\_\_\_\_\_

2. Why is cellular respiration called an aerobic process?

\_\_\_\_\_

3. Where does cellular respiration take place?

\_\_\_\_\_

4. What happens during glycolysis?

\_\_\_\_\_

**MAIN IDEA:** Cellular respiration is like a mirror image of photosynthesis.

5. In what two ways does cellular respiration seem to be the opposite of photosynthesis?

\_\_\_\_\_

\_\_\_\_\_

6. In which two parts of a mitochondrion does cellular respiration take place?

\_\_\_\_\_

7. Write the chemical equation for the overall process of cellular respiration.

\_\_\_\_\_

8. Explain what the equation means. Identify the reactants, products, and the meaning of the several arrows.

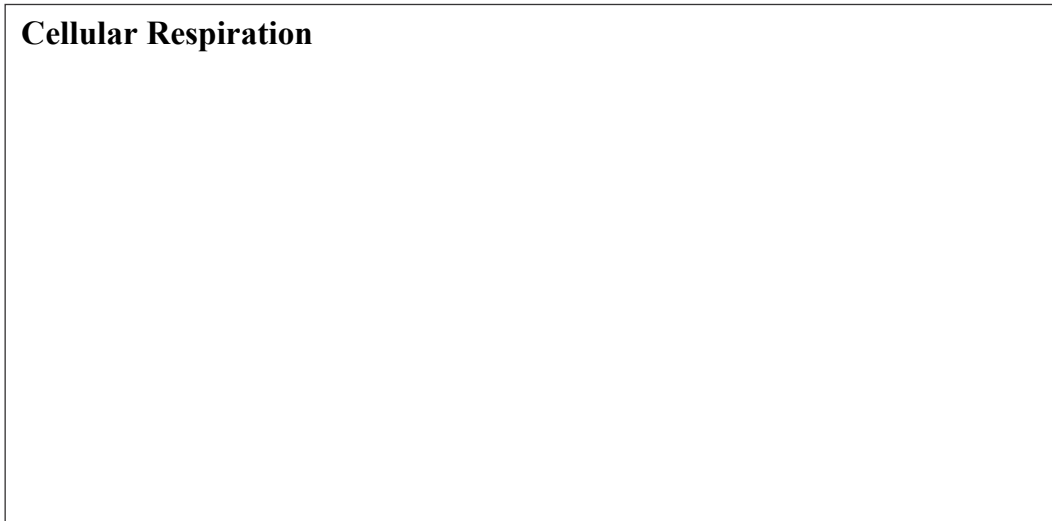

\_\_\_\_\_

\_\_\_\_\_

**Study Guide B *continued***

Use the space below to sketch and label a mitochondrion. On the sketch, write the four steps of the cellular respiration process that occur in the mitochondrion.

**Cellular Respiration**

**Vocabulary Check**

9. The prefix *glyco-* comes from a Greek word that means “sweet.” The suffix *-lysis* comes from a Greek word that means “to loosen.” How are the meanings of these word parts related to the meaning of *glycolysis*?

\_\_\_\_\_

\_\_\_\_\_

10. What does it mean to say that glycolysis is an anaerobic process?

\_\_\_\_\_

11. What is the Krebs cycle?

\_\_\_\_\_

\_\_\_\_\_
