3. The antebrachial region is _____ to the brachial region.
4. A _____ section divides the body into equal left and right halves.
5. Ventral is a directional term synonymous with _____ in humans.

Multiple Choice: *Identify the choice that best completes the statement or answers the question.*

- ___ 6. When correctly situated in anatomical position, where are your feet in relation to your knees:
- | | |
|--------------|------------|
| (A) proximal | (D) distal |
| (B) medial | (E) deep |
| (C) superior | |
- ___ 7. Which of the following orientation and directional terms have the same meaning (in humans):
- | | |
|---------------------------|--------------------------|
| (A) superior and caudal | (D) anterior and ventral |
| (B) inferior and cranial | (E) anterior and dorsal |
| (C) inferior and cephalad | |
- ___ 8. Which of the following orientation terms have opposite meanings (in humans):
- | | |
|------------------------------|--------------------------------|
| (A) superficial and proximal | (D) medial and anterior |
| (B) distal and proximal | (E) posterior and intermediate |
| (C) medial and distal | |
- ___ 9. Which of the following regional terms means the anterior surface of the elbow:
- | | |
|----------------------|------------------------|
| (A) calcaneal region | (D) vertebral region |
| (B) scapular region | (E) antecubital region |
| (C) gluteal region | |
- ___ 10. Mandy pulled a muscle in the inguinal region. Where is this region:
- | | |
|-------------|-----------|
| (A) groin | (D) thigh |
| (B) buttock | (E) hip |
| (C) leg | |

Name: _____

ID: A

- ___ 11. In describing the relationship between the patellar and popliteal regions:
- Ⓐ the patellar region is superior to the popliteal region
 - Ⓑ the patellar region is proximal to the popliteal region
 - Ⓒ the patellar region is distal to the popliteal region
 - Ⓓ the patellar region is lateral to the popliteal region
 - Ⓔ the patellar region is anterior to the popliteal region

True/False: *Indicate whether the statement is true or false.*

___ 12. *Proximal* means farther from the origin of a body part.

___ 13. Transverse or horizontal sections divide the body into anterior and posterior parts.
